LAKEVIEW GARDENS  
BOX 20, FENTON, MICHIGAN

In reply to your recent letter inquiring about African Violet plants, this is to advise you that we will have *Saintpaulia grotei*, the climbing African Violet, also *Saintpaulia magungensis* and *Saintpaulia tongwensis* ready for shipment

The price of these plants is \$2.50 per plant from two inch pots. Orders accompanied by cash or money order will be filled after in the order in which received and until the supply is exhausted.

Recently brought from Africa, the new species, *Saintpaulia grotei*, has brown, creeping stem which grows up to two feet the first year, leaf stem up to ten inches long and leaves up to four inches across. Its light blue flowers shade to deep violet at the center.

*Saintpaulia magungensis* has creeping and branching brown stems which hang down over the rim of the container. The stem may be tied to a stake and it will grow upright, similar in growth to a staked tomato. The leaves are medium green on the upper surface and pale greenish white on the lower and cupped downward. It has violet blue petals with darker centers and bright yellow anthers.

*Saintpaulia tongwensis*, of which we have a very limited supply, has a broad pale green band along the center of each leaf parallel to the mid-vein in the leaf. The flowers are pale violet blue.

Trusting that we may have the opportunity of serving you, we are,

Yours very truly,

LAKEVIEW GARDENS.

GROWERS OF NEW SPECIES OF AFRICAN VIOLETS

In regard to your question, the plant, which is to be used in the study, is the one which is being used in the study.

The name of the plant is *Salvia miltiorrhiza*, which is a member of the *Lamiaceae* family. The name is *Salvia miltiorrhiza*.

It is a perennial herb, growing to a height of 1-2 meters. The leaves are opposite, ovate, and have a serrated margin. The flowers are small, tubular, and are arranged in a terminal whorl.

The plant is native to China, where it has been used for centuries. It is now cultivated in many other countries, including India, where it is used in traditional medicine.
